# STELLA MARIS COLLEGE (AUTONOMOUS) CHENNAI - 600086. (For candidates admitted during the academic year 2015-16 and thereafter) <br> <br> COURSE CODE: 15CM/ME/PF55 

 <br> <br> COURSE CODE: 15CM/ME/PF55}

## B.COM DEGREE EXAMINATION DECEMBER 2020 <br> COMMERCE <br> FIFTH SEMESTER

## COURSE : ELECTIVE

PAPER : PORTFOLIO MANAGEMENT
TIME : 90 MINUTES
MAX. MARKS: 50

Section - A
Answer All questions:

1. Define Portfolio Management.
2. Write short note on Price Earnings Ratio.
3. A Rs. 5,000 bond with a $10 \%$ coupon rate matures in 8 years and currently sells at $97 \%$. Is this bond a desirable investment for an investor whose required rate of return is $11 \%$ ?

## Section - B

Answer any Three questions:
4. Explain pattern analysis with the help of diagrams.
5. ABC Ltd. Issues a $14 \% 10$-year bond with face value and maturity value of Rs. 1,000 . What is the value of bond if the required rate of return is (i) $12 \%$ (ii) $14 \%$ (iii) $16 \%$ ?
Examine the difference in value.
6. A portfolio consisting of five securities is shown below: Calculate each stock's expected return. Then, using these individual security's expected returns, calculate the portfolio's expected return.

| Stock | Initial Investment <br> Value (Rs.) | Expected end of <br> period Investment <br> Value (Rs.) | Proportion of <br> Portfolio's Initial <br> market value |
| :---: | :---: | :---: | :---: |
| A | 4,000 | 6,000 | $15 \%$ |
| B | 2,000 | 3,500 | $9 \%$ |
| C | 3,500 | 4,500 | $14 \%$ |
| D | 9,000 | 11,000 | $38 \%$ |
| E | 3,000 | 4,500 | $11 \%$ |

7. Six portfolios experienced the following results during a 7 years period:

| Portfolio | Average return | Standard <br> deviation | Correlation with <br> market |
| :---: | :---: | :---: | :---: |
| I | 18.6 | 27.0 | .81 |
| II | 14.8 | 18.0 | .65 |
| III | 15.1 | 8.0 | .98 |
| IV | 22.0 | 21.2 | .75 |
| V VI | -9.0 | 4.0 | .45 |

The risk-free rate of interest is $9 \%$ and market risk is $12 \%$.
Rank these portfolios using (i) Sharpe's, and (ii) Treynor's Ratio.
Compare the ranking and explain the reasons behind the differences.

Section - C
Answer any One question:
$(1 \times 20=20)$
8. Following information is available in respect of five securities:

| Security | Expected Return | $\boldsymbol{\beta}$ | $\boldsymbol{\sigma}^{\mathbf{2}} \mathbf{e i}$ |
| :---: | :---: | :---: | :---: |
| I | 14 | 1.5 | 10 |
| II | 9 | 1.0 | 20 |
| III | 8 | 0.8 | 10 |
| IV | 12 | 1.5 | 20 |
| V | 15 | 1.0 | 30 |

Construct an optimal portfolio as per Sharpe Optimization Model given that Risk-Free Rate, $\mathrm{I}_{\mathrm{RF}}$, is $5 \%$ and the variance of the market, $\sigma_{\mathrm{m}}{ }^{2}=10$.
9. An investor is contemplating the construction of a portfolio for which he has short listed two securities X and Y . The expected return and Standard Deviation of these securities are as follows:

| Security | Expected Return | Standard Deviation |
| :---: | :---: | :---: |
| X | $9 \%$ | $2 \%$ |
| Y | $9 \%$ | $4 \%$ |

Find out the expected returns and standard deviation of the following portfolios given that the correlation coefficient between X and Y is -1 .

| Security X | Security Y |
| :---: | :---: |
| $100 \%$ | $0 \%$ |
| $80 \%$ | $20 \%$ |
| $66 \%$ | $34 \%$ |
| $20 \%$ | $80 \%$ |
| $0 \%$ | $100 \%$ |
