DECEMBER 2020
FIRST SEMESTER

COURSE: FOUNDATION CORE

TIME: 1 ½ HOURS

PAPER: ENGLISH FOR COMMUNICATION - I

MAX. MARKS: 50

SECTION A

I. Read the following passage and answer the questions that follow. (20 marks)

Soon in Chennai: a new lake with island parks and a mountainous Miyawaki forest

THE HINDU

Special Correspondent

CHENNAI, NOVEMBER 28, 2020 14:43 IST

Several water bodies have come to life following the copious rains in the city's southern suburbs due to Cyclone Nivar.

Pallikaranai Anai Eri is one such lake. It is being developed in an area of about 50 acres, with three island parks inside, at a cost of ₹1,100 lakh. Ahead of the cyclone, about 60% of the work was completed, and it is already serving its purpose as rainwater has filled it.

During a visit last week, Greater Chennai Corporation (GCC) Commissioner G. Prakash asked officials to strengthen the embankments of this lake with strong boulders, to lay favor blocks on the roads formed, and to test the water inflow for any micro-organisms and to complete the works before January 2021. He was accompanied by A. Senthil Kumar, Project Officer, District Rural Development Agency, Chengleput District, Thirunavukkarasu and Purusothaman, executive engineers of GCC, and Rajavelu, executive engineer, Water Resources Department, Chengleput district.

Mr. Prakash advised the officials to plant native trees along the periphery of the lake, with beautification of islands inside, by getting technical inputs from S. Raja Mohamed, a retired Joint Director of the Horticulture Department, and a resident of the area.

This project will help recharge ground water for nearby dwelling places, conserve of native tree species of the region, develop unique green cover with aesthetic appeal and therapeutic value,

reduce the impact of air, noise pollution and dust and reduce the soil erosion at the embankment slopes, said Mr. Raja Mohamed.

Mountainous Miyawaki

Near the lake, a unique 'Mountainous Miyawaki Forest' is being developed on the OSR land belonging to Medavakkam panchayat. This forest will have plants of native habits, bird-attracting fruit trees like jamun, cherry, kodukkaipuli and plants with medicinal importance like amla and fig and other avenue forest trees with life fencing, on the periphery.

Work for formation of RWHS (Rain Water Harvesting Structure) channels connecting to the existing drainage channels is being executed. Silt, rich in organic nutrients, excavated from the nearby Anai Eri has been dumped on this site to make the mountainous structures healthy, Mr. Raja Mohamed said.

Mr. Prakash visited this site as well and provided inputs, asking the officials to expedite the work.

A. Choose the correct answer for the following questions. (10x1=10)

1. According to the report, Cyclone Nivar
 - a. has destroyed the city's trees
