

Dr. KALPANA JAYARAMAN

Zoology Faculty

2008 -

Dr. Kalpana Jayaraman is Assistant Professor in the Department of Zoology, Stella Maris College (Autonomous). An ardent nature lover, she likes taking a break from her teaching and other schedules with a nature walk around the college campus, armed with her camera. Dr Kalpana is also an alumna of the Department of Zoology.

The Folio titled 'Butterflies on Campus' is an outcome of two years of observation of butterflies seen on campus of Stella Maris College by the author. This is a photo-document of 43 of the 55 species that have been observed. The Folio aims at attracting the reader to the wonderful world of butterflies with colourful photographs and simple descriptions of butterfly behaviour. It is a comment on the amazing insect life that thrives and perpetuates within patches of green in an urban setting.
